

Level 3 Using Place Value

These number talks focus on two and three-digit numbers; some require regrouping, some do not. Remember it is all mental math; not paper allowed. Example: Regrouping: $15+27$ might be computed as $10 + 10$ is 20; $5+7$ is 12; $20+10+2=32$. Regrouping not needed $23+36$; $20+30=50$; $3+6=9$; $50+9=59$. This may not be their method. Accept all strategies. Focus on the structure. Record their thinking. Ask “Did anyone do it a different way?”

Week 7

$11+28$

$14+35$

$15+22$

$18+31$

$27+15$

$18+23$

$17+25$

$26+18$

$25+35$

$28+32$

$17+23$

$16+24$

$46+32$

$47+22$

$23+24$

$32+24$

$22+18$

$15+26$

$28+17$

$16+36$

Week 8

$28+31$

$33+14$

$24+42$

$12+17$

$22+18$

$26+15$

$28+17$

$26+36$

$17+43$

$34+28$

$26+48$

$18+47$

$200+200$

$199+199$

$198+199$

$198+198$

$77+36$

$65+58$

$46+88$

$47+74$

Week 9

$158+221$

$113+236$

$234+305$

$262+35$

$135+219$

$315+192$

$173+167$

$293+115$

$365+247$

$292+138$

$254+168$

$292+139$

$146+277$

$188+216$

$267+255$

$185+146$

$111+999$

$222+888$

$333+777$

$777+444$
